

Solutions for Educational Institutions

Reach Out. To more students, more frequently without increasing faculty costs.

vReach's webcasting solutions lets you capture lectures, training or workshops and deliver them online to students. vReach webcasts are made more powerful with video and viewer-interactivity features.

- Teach once and reach multiple audiences
- Enable students to review complicated material repeatedly, at their convenience
- Reduce travel costs and increase faculty output and efficiency
- Create an online knowledge bank of lectures

vReach application areas

- Distance learning
- Recorded lectures
- Self guided study
- Student recruitment
- Parent/student orientation
- Campus virtual tours

vReach meets the following challenges

- Lectures are available to students 24x7
- Classes are not dependent on teacher availability
- Creates more interactive and personal online experiences

The vReach advantages

- Gain competitive advantage over traditional classroom offering
- The best and brightest faculty is accessible to all students
- Provide remote students with the same in-class lecture experience
- Build e-learning programs quickly and easily

Return on investment

- Teach more students without new classrooms or facilities
- Increase productivity of star teachers
- Increase student satisfaction levels
